EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

This application is in condition for allowance except for the presence of claims 26-63 directed to an invention non-elected without traverse. Accordingly, claims 26-63 been cancelled.

It is noted that while the applicant orally traversed the restriction, as the subsequent response did not specifically point out the alleged deficiencies of the restriction the election was treated as being without traverse.

Allowable Subject Matter

Claims 22, 23, and 64 are allowed.

The following is an examiner's statement of reasons for allowance: Claim 64 distinguishes itself over the prior art of record with regards to the substantially equal amount of water with regards to the reaction mixture volume added in the first step of claim 21. The closest prior art of record all teach a substantial excess of water in the being added to the reaction mixture (See e.g. Funaoka et al., JP 2002/105240). There is nothing in the prior art of record to teach that the amount of water added to the lignocellulosic reaction mixture is a result effective variable. As such, a person having ordinary skill in the art at the time of invention would not have found it obvious to optimize the amount of water added during the process..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
